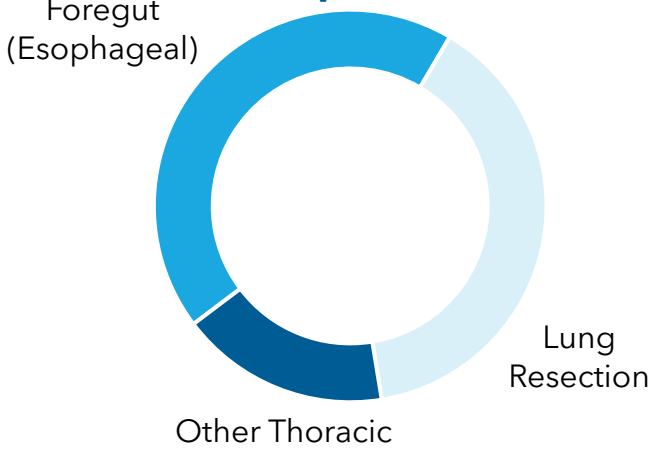
of patients are treated with Minimally Invasive Surgery (MIS)

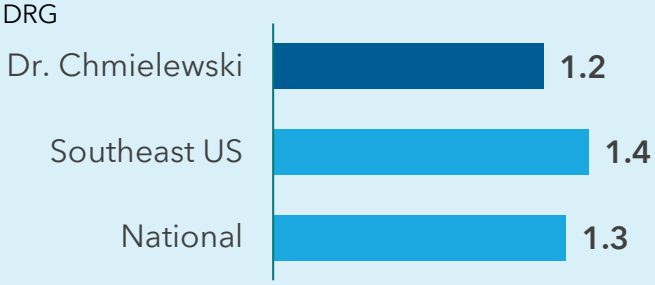
Dr. Chmielewski's robotic experience
700+ patients



MAJORITY OF PATIENTS EXPERIENCE A MINIMALLY INVASIVE SURGERY

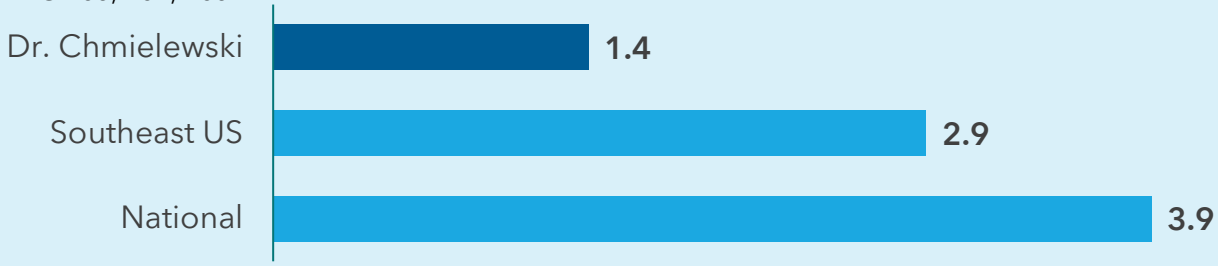
Average foregut (esophageal) length of stay days

DRG



Average lung resection length of stay days

DRG 163, 164, 165†



*From Electronic Health Record **assisted surgery reflects a single surgeon experience (data is not collected under formalized study

Refer Patients with:

- ***Lung Cancer***
- ***Esophageal Cancer***
- ***Gastroesophageal Reflux Disease***
- ***Paraesophageal Hernia***
- ***Complex Foregut***
- ***Achalasia***
- ***Mediastinal Masses***

Why refer to Dr. Chmielewski?

We use the most **advanced robotic technology**, the da Vinci system, to deliver superior patient outcomes–helping patients go home sooner, experience less pain, have fewer complications, and return faster to what matters most.

We offer both robotic **Lung and Esophageal Procedures** coupled with an outstanding thoracic team of advanced practice providers and a dedicated hospital team of support physicians and nurses

AdventHealth Orlando's investment in robotic-assisted surgical technology ensure more patients receive a minimally invasive surgery so that they are more likely to go home sooner, have fewer complications, and return to work faster.
